

# FACT SHEET

## WHAT IS NOVEL CORONAVIRUS

The novel coronavirus (COVID-19) is a new strain of a large family of viruses that cause illness ranging from the common cold to more severe diseases. Scientists have isolated the coronavirus causing COVID-19 and found it to be at least 70% similar in genetic sequence to MERS and SARS.<sup>[1, 2]</sup>

COVID-19 can take up to **10-days** between **infection** and **detection**<sup>[3]</sup> when symptoms are present

<b>Incubation</b> 5-6 days	<b>Detection</b> 4-5 days
-------------------------------	------------------------------

Source: Center for Disease Control

## SYMPTOMS

Source: Center for Disease Control<sup>[4]</sup>, WHO

• Fever • Breathing difficulty • Cough • Shortness of breath

### Severe cases

• Pneumonia • Kidney failure  
• Severe acute respiratory infection • Death

## HOW NOVEL CORONAVIRUS ENTERS

EMPLOYEES

CUSTOMERS

## HOW NOVEL CORONAVIRUS SPREADS

**NOVEL CORONAVIRUS  
IS SPREAD BY DROPLETS**

MADE WHEN INFECTED PEOPLE COUGH, SNEEZE OR TALK

**TOUCHING**

CONTAMINATED PEOPLE, OBJECTS OR SURFACES

# PREVENTION

## ▶ TAKE ACTION

### Know your novel coronavirus facts.

Get access to educational & procedural information. Refer to your local health authorities and the WHO.

People with novel coronavirus should not prepare food or serve beverages for others until their symptoms have resolved.

Sick? Visit doctor

### Encourage employees to:

- Stay at home or visit the doctor if they are sick
- Clean and sanitize impacted areas

**FACT:** Patients are most infectious during the **first three days** of illness.

### Frequent handwashing

Thoroughly wash hands and exposed portions of arms with Ecolab hand soap and warm water

for at least  **seconds.** Use designated handwashing sink.

### Sanitize Hands

Use alcohol-based Ecolab hand sanitizer without rinse.

### Cover your mouth & nose

Cough or sneeze into a tissue or flexed elbow.

### Avoid close contact

with anyone showing symptoms of respiratory illness.

## ▶ CLEAN THOROUGHLY & ROUTINELY

### CLEAN & DISINFECT

frequently touched objects and surfaces with a properly registered disinfectant.

- Light and air control switches
- TV and remote controls
- Door handles and push plates
- Faucets and toilet flush levers
- Telephones and computers
- Other surfaces as needed

**All surfaces** that may have contacted respiratory secretions, urine or feces according to standard infection control procedures.

### CLEAN & SANITIZE

Follow warewashing standards for plates, glass, silverware and other ware.

# RESPONSE

- 1. **Report** any suspected incidents to management
- 2. **Follow** Ecolab guidelines for infection prevention
- 3. **Send** sick employees home or to the hospital
- 4. **Stock** disinfectant products as preventative approach
- 5. **Clean & sanitize** all areas; follow cleaning standards for contaminated surfaces - reference procedure on product label
- 6. **Disinfect** high-touch surfaces with Ecolab preventative solutions - reference procedure on product label
- 7. **Follow up with doctor** check the status of your employee if they require special care

For emerging or novel viruses like COVID-19 (formerly novel Coronavirus or nCoV), companies have not yet acquired or tested efficacy of products against the virus. Certain countries have policies or general claims that address this (e.g. US EPA Emerging Viral Pathogen Guidance, EU viral claims) by utilizing a hierarchy of susceptibility of viruses to disinfectants. In general, these policies are based on the ability of a product to kill a 'harder to kill' virus and may or may not require preapproval for use in outbreak situations.

Always follow directions for use on EPA-registered label.

# ECOLAB PREVENTIVE SOLUTIONS

The products in the table below are broad-spectrum virucidal hard surface disinfectants that are expected to inactivate the 2019 Novel Coronavirus (2019-nCoV) when used in accordance with the directions for use. Contact your Ecolab Account Executive for additional product information.
