AQUANOMIC™

Solid Chemistry
90% less physical strain
74% less packaging waste

Consistently White, 
Bright Linens

40% water savings
50% energy savings

20%+ reduction in linen replacement
$9,500 total annual savings potential

Actionable Insights

Solve your laundry problems, reach your goals and please your guests with the Aquanomic 2.0 Low-Temp Solid Laundry Program

1 Results of a comparative study “Liquid vs. Solid Products,” commissioned between Ecolab and the Institute for Work Safety (IFA/St. Augustin, Germany).
2 Waste savings on Solid Program vs. a traditional liquids program (three products: Detergent, Bleach and Softener, in 5-gallon pails) as the baseline.
3 Based on 160-room sleeping property, 75% occupancy rate, 16 pounds of linen per room, 100°F versus typical laundry temperature of 120°F and national-average utility rates.
Customer linen savings based on market linen research studies conducted April 2013 – December 2014, annual linen replacement data from over 700 hotels from 2011 – 2015.

The Foundation of Wellness? Sleep

Getting a sound, restful night’s sleep reaps countless health benefits. It’s the cornerstone of improved wellness. While most of us understand we should get at least seven to nine hours of solid sleep a night, we take for granted just how important that goal is to our long-term health. According to Sleep.org, here’s a few key reasons why everyone should make it a priority:

- **Improved Focus and Memory.** When you get a good night’s sleep, it’s easier to keep your attention on and complete tasks more efficiently. You are also likelier to have fewer memory problems.

- **Improved Mood.** When you’re sleep-deprived, your emotions are harder to control and you feel more stressed. So the more sleep that you get, the less cranky you’re going to feel.

- **Improved Productivity.** At work, you’ll notice that you get through tasks faster and make fewer mistakes.

- **Less Illness.** Your immune system needs sleep to stay strong and fight off colds and other infections – critical when you travel for work. In the long-term, getting plenty of sleep helps reduce the risk of heart disease, high blood pressure, diabetes and other serious diseases.

As purveyors of sleep, hotels worldwide continue to make the guest sleep experience a priority and are investing significantly toward this goal. They understand the power of this key differentiator and its impact on guest satisfaction and loyalty. Reviews are hard to ignore. In fact, fifty-five percent of travelers said they look for reviews that specifically address sleep quality* in a recent TripAdvisor survey.

To help you achieve an exceptional guest sleep experience, we are pleased to offer complete bedding solutions from the industry’s leading suppliers -- everything you need to delight guests and meet a variety of budget and brand requirements.

**Beautyrest® Hospitality**
Innovative Beautyrest® bedding options, all with Advanced Temperature Management Design, for a cooler, more comfortable night’s rest and proven, lasting performance.

**The WynRest® Bedding Collection**
Featuring a full array of linens, duvet covers, mattress pads, pillows and blankets, the line provides everything you need to create a memorable guest sleep experience.

Make your guest sleep experience review worthy! Visit WHRSourcing.com for complete product details and ordering information.

* [https://www.huffingtonpost.com/2013/10/10/hotels-sleep_n_4073574.html](https://www.huffingtonpost.com/2013/10/10/hotels-sleep_n_4073574.html)
Why Beautyrest® Hospitality?

We believe hospitality is an extension of our brand. We take pride in supporting the needs of Wyndham Hotels & Resorts with innovative bedding solutions designed to deliver a lower total cost of ownership and exceptional guest sleep experience.

We listen – to your needs and those of your guests – and innovate around both. Our focus? Ensuring our beds stay in your hotels longer and deliver reliable, durable performance from the first day in a guest room to the last.

The Beautyrest® Advantage

In 1925, we created the Beautyrest® Hospitality and it certainly was revolutionary for its time. But it’s how we’ve innovated that Beautyrest Pocketed Coil® product to deliver not only an exceptional guest sleep experience, but also amazing durability that makes our products truly special. Each coil works independently, contouring to the curve of the body and preventing motion from being transferred from one side of the bed to the other. The design is the reason why our bed is comfortable, performs and lasts a long time.
Innovators never sleep. Every single day we think about the future, the next idea. It’s a constant restlessness about how we move to the next level; to consistently deliver products that match a brand’s requirements and exceed guest expectations. We believe our approach to innovation sets our company apart from all others.

The latest innovation in mattress technology is all about temperature management – from the inside out. The Beautyrest® Hospitality line features an exclusive temperature management design. DualCool™ Fiber technology provides the first layer of mattress comfort and protection, infused with silver to provide a proven anti-microbial shield. Below that, our patent-pending AirCool® foams allow for the circulation of air, mitigating heat from accumulating in the mattress. All of this technology is designed to help the bed stay cooler and ensure guests sleep more comfortably.

We have an amazing group of people at our Sleep Technology and Advanced Research (STAR) center dedicated to looking for new innovative products, new fabrics, foams and new technologies. If we’re not innovative and we are not moving, we’re sitting still as a company and that’s not where Beautyrest® Hospitality wants to be.

PROMOTING GUEST WELLNESS

We live in a sleep deprived country. Studies prove it. Experts continue to stress the importance of getting the required amount of sleep in order to avoid serious health issues. We are helping hotel brands create brand-defining sleep experiences, understanding the power of this key differentiator and its impact on guest satisfaction and loyalty.

Innovation with Purpose

Every day, we think about how we can improve our products; how to make a great bed even better. Our purpose? To help you deliver a brand-defining experience that strengthens guest loyalty – and your bottom line.

ADVANCED DESIGN, INNOVATIVE MATERIALS

Comfortable Motion Control
Beautyrest® Pocketed Coil® technology for unparalleled comfort and support

DualCool™ Technology Fiber
Soft, supple fiber enhanced with silver to prevent the growth of bacteria, mold and mildew.

Temperature Management Design
AirCool® Gel-infused Foam designed for optimal temperature management

EnduroTECH® Foundations
Designed to last a minimum of 10 years in a hotel room

Our purpose? To help you deliver a brand-defining experience that strengthens guest loyalty – and your bottom line.
How to Order for Your Property

1. All purchase orders must be faxed to your sales representative (or emailed to mike@freemankelley.com) for processing. A contact name and phone number must be included on the purchase order.

2. A Customer Service Representative will contact you to arrange/confirm the scheduled delivery date.

3. Every NEW customer must submit an account application form, there are three options:
   - **Cash with order**: Cash, check, money order, Visa, Mastercard, Discover, and American Express
   - **50% / Net 30**: 50% deposit required; remaining balance due as or before product ships
   - **Open Terms**: Net 30 days with approved Credit (first order minimum of $5,000 required)

Upon receipt, review and approval of the appropriate application form, a customer’s order will be processed. *Trade, Dun and Bradstreet and bank references are required prior to the approval of Open Terms Credit applications. Open Terms Credit applications may also require an initial deposit to be paid in advance of any orders being fulfilled.

4. Normal lead-time is three to four weeks. Custom sizes require six weeks.

5. Delivery service for orders of 12 sets (or 24 pieces) or more is provided by Beautyrest® Hospitality at no charge within 400 miles of the plant and within the Continental U.S. only, providing the location can accommodate a 53' trailer. Less than 12 sets (or 24 pieces) will incur a one-time $75 USD stop charge. Prices not valid for Hawaii, Canada, or Puerto Rico.

6. To make changes to an order, notify your representative in writing at least 10 business days prior to delivery.

All products and services are provided by SSB Hospitality, LLC and not Wyndham Hotels & Resorts (WH&R) or its affiliates. Neither WH&R nor its affiliates are responsible for the accuracy or completeness of any statements made in this advertisement, the content of this advertisement (including the text, representations and illustrations) or any material on the listed supplier’s website to which the advertisement provides a link or a reference. Please refer to the applicable brand standards for your property prior to purchasing products.
TERMS

• Cash with order: Cash, check, money order, Visa, MasterCard, Discover, and American Express
• 50% / Net 30: 50% deposit required; remaining balance due as or before product ships
• Open Terms: Net 30 days with approved Credit (first order minimum of $5,000 required)

Each client must complete an account application either for Credit or for a Cash account. When applying for credit with the Beautyrest® Hospitality Bedding Company it is very important the completed application with all requested financial information is submitted. Applications with omitted information could result in our inability to grant credit. In the case of LLC’s, Beautyrest® Hospitality requires the names of the investment partners and their credit worthy status. Clients have the option of paying cash for an order to avoid submission of privileged credit information.

CREDIT HOLD

All accounts are set-up with specific credit terms and a specific credit line. If payments are not received within the account terms, all subsequent orders are subject to credit hold until the account returns to a “current” status.

CHANGE OF ORDER

All order changes (quantity, address, date) must be sent in writing a minimum of 10 (ten) business days prior to the designated ship date. Verbal requests are not accepted. This is required to insure acquisition of all the special materials required to make quality hospitality bedding products. In the case of a change that is not communicated to Beautyrest® Hospitality in the prescribed time parameters, we reserve the right to charge for extra costs. Those charges will be 15% of the order total or $200, whichever is greater. Requests for changes to orders in production will not be accepted!

MINIMUM ORDER CHARGE

A $75.00 Minimum Order Fee will be charged for orders of less than 12 sets or 24 pieces.

FREIGHT CHARGE

Free tailgate delivery within 400 miles of a Beautyrest® Hospitality Plant, not including Hawaii, Alaska and Puerto Rico. Any distance over 400 miles the client will be charged for the incremental mileage over 400 miles.

Property must be able to receive a 53’ tractor trailer. Delivery in equipment less than a 53’ tractor trailer is subject to additional charges to be determined by Beautyrest® Hospitality. These arrangements must be completed 10 days before shipment of first order.

DRIVER WAIT TIME

Tailgate deliveries include two (2) hours of driver wait time for full truckloads; however, this does not apply for partial truckloads. Requests for additional time may result in additional charges to the client.

INSPECTION OF DELIVERY UPON ARRIVAL

Upon arrival, Beautyrest® Hospitality requires that all products delivered be inspected by the client or a designated agent. All discrepancies should be clearly marked on the Bill of Lading. Discrepancies include shortages and damages.

Claims after delivery that were not indicated on the bill of lading will not be accepted. Damaged or incorrect product should be refused at delivery.

REFUSALS & RE-DELIVERY

Any Beautyrest® Hospitality delivery that is refused in its entirety, not for damage or incorrect product at the point of delivery, will incur freight and redelivery charges. The client may be required to pay charges before the redelivery is scheduled.

RETURNS & CANCELLATIONS

The following fees will apply to order cancellations; they are based on specific time windows:

• 10 or more business days in advance of ship date: Full refund and no restock fee
• 6-9 business days in advance of ship date: 30% restock fee
• Less than 5 business days in advance of ship date or after production: 60% restock fee

STORAGE CHARGE

Storage charges of $50.00 per day, per truckload, will apply for orders that are already produced when delivery dates are moved out to a future date.

DROP TRAILER CHARGES

In the event a client requires a drop trailer during an installation, Beautyrest® Hospitality will quote the cost for the trailer rental, dead head delivery costs, and any other needs required by the client. A signed Release of Liability is required.

FREIGHT CLAIMS

Beautyrest® Hospitality will process a freight claim up to 30 days after the delivery if damages are noted on the Bill of Lading.

WARRANTY CLAIMS

In order to file a claim, client must contact Contract Warranty department at: contractwarranty@simmons.com

GENERAL

• FOB hotel property or designated warehouse
• Lead time is 3 – 4 weeks
• Beautyrest® Hospitality pricing does not include sales tax. At the time of order, those taxes will be calculated and added to the invoice, along with the minimum order fee if applicable, and are considered part of the purchase price.
• State Recycling Fees will be assessed as specified in the following site: www.mattressrecyclingcouncil.org
SAY GOOD NIGHT TO ORDINARY BED LINENS.

While not all sources of noise are within your control, many are. Leaky faucets, buzzing light fixtures and loud HVAC equipment should be addressed immediately before guests have the opportunity to complain. Your housekeeping staff can be your first line of defense here. Add potential sources of noise to the room checklist so maintenance can be informed and take action to resolve any identified issues.

The best time to address sound-proofing, of course, is when a property is being built or remodeled. Short of that, there are a number of ways to mask or muffle noise. Here’s a quick overview of what hotel properties are doing to keep the noise level down in and around guest rooms and increase guest satisfaction.

- Eliminate connecting doors between adjoining guest rooms.
- Create quiet zones during specific hours to accommodate different classes of guests – families with small children, daytime sleepers like airplane crews, etc. Housekeeping won’t vacuum carpets during these established timeframes and bellman will carry bags by hand.
- Install soundproof windows.
- Install soundproofing technology such as Acoustiblok, to soundproof walls, floors and ceilings in high-traffic public areas like restaurants, bars and ballrooms.
- Install carpet over wood or tiled floors and use sound-absorbing panels in public areas.
- Sound masking systems can be installed in guest rooms, creating pleasurable white noise.
- Install thicker doors with a door sweep at the bottom to seal out hallway noise.

Building a quieter hotel – or making soundproofing enhancements to an existing one – does require additional investment. But losing guests because they had a horrible night sleep could prove more costly in the long run. Ask the architect or builder familiar with your property, what they can do to further support the soundproofing of your hotel. For more information and resources, visit www.WHRSourcing.com.
The WynRest® mattress pad collection
This soft yet protective mattress pad will ensure that your guests enjoy a great night’s sleep. Using 100% recycled fill makes this product environmentally friendly.

**WYNREST® 4 OZ. FILL FITTED MATTRESS PADS**

Mattress pads are T-220 reversing to microfiber with an elastic four way stretch skirt. Mattress pad fitted material stretches up to 90% to fit a maximum height mattress of 20”. Manufactured exclusively by Sobel Linen.

The T-300 linen is also an optional upgrade to Brand Standards that require the use of T-200 or T-250 linen.

*Cut sizes listed above for pillow cases and finished sizes listed above for flat and fitted sheets.*
TRIPLE SHEETING is a luxurious, cost-effective and efficient bedding solution for the hospitality industry. It guarantees a clean, crisp bed that is easily managed by the housekeeping staff—ultimately saving considerable time and money.

CLEAN AND FRESH
Triple Sheet components can be laundered after each guest to ensure a sanitary environment.

REDUCES COSTS
Bedspr eads can cost $100 – $250 per piece, and up to $25 per piece in off-site laundering. By replacing a bedspread with one additional sheet, the Triple Sheet technique can significantly reduce overall operational costs.

SAVES TIME
Duvet covers cause housekeeping to spend three times longer to make the bed. Triple Sheet is an easy and efficient step-by-step process that can greatly increase housekeeping productivity.

ITEMS NEEDED: flat or fitted sheet to cover mattress, basic flat sheet, blanket or duvet insert and decorative top sheet.

STEP 1: BUILD YOUR FOUNDATION
Option 1) Lay a flat sheet on mattress and tuck all the way around the bed. Option 2) Use a fitted sheet to cover mattress (This is the Bottom Sheet)

STEP 2: ADD FIRST LAYER
Place the top hem of first flat sheet so it is even with the top of the mattress. The sheet should be even on all sides and smooth (This is the Middle Sheet)

STEP 3: ADD FILLING
Using a blanket or duvet insert, place on top of the blanket approximately 6 inches below the top of the mattress.

STEP 4: ADD DECORATIVE TOP SHEET
Place remaining flat sheet, such as 1888 Beyond, on top of the blanket. (This is the Top Sheet)

STEP 5: FOLD AND TUCK
Fold 1) Take the top of both flat sheets and fold down together about 6 inches (blanket should not be included in this fold). Fold 2) Then fold down the two flat sheets and the blanket another 6 inches. The sheets should now be folded twice and the blanket folded once. Tuck end of all three items beneath the foot of the mattress.

STEP 6: FINISHING TOUCHES
First) Lift extra fabric and pull tightly parallel to end of mattress. Second) At corner of mattress, push in excess fabric. Third) Tuck in all excess fabric underneath the side of the bed
BEAUTIFUL, STRONGER & SOFTER

WynRest®

✓ T-220 DOLCE NOTTE TOP SHEET, TONE ON TONE

✓ 60% COTTON/40% POLYESTER BLEND

✓ 6 MM TWILL STRIPE

Looking For WynRest® Microfiber Bedding?
WE HAVE YOU COVERED.

HD Supply is more than just your maintenance and OS&E supplier of choice. We’re also your source for Wyndham Hotels & Resorts-approved bedding supplies, including the WynRest® 85 GSM Microfiber Sheet Program.

New WynRest® Microfiber Bedding:
• Has super-fine brushing, which offers a luxuriously soft feel
• Its 3M Stain Release and Moisture Management treatments help combat stains and perspiration
• Uses as little as 35% of the energy needed to wash and dry 200T CVC sheets*
• Is shown to last up to 2x longer than 200T CVC sheets*
• Is Wyndham Hotels & Resorts Green approved: made of 100% recycled/recaptured materials

*Results of performance testing by EcoLab, Crown Laundry (third party).

3M SCOTCHGARD™ STAIN RELEASE PROTECTION

Stains are never in. That’s why there’s Scotchgard™ Protector stain release finish to help most stains wash out during normal laundering, while textiles stay soft, breathable and natural.

You expect your textiles to work as hard as you do. So, Scotchgard™ Protector stain release finish helps meet these expectations of resisting stains, making textiles easier to care for and lasting through repeated launderings.

- Helps most stains come out in the wash
- Protection lasts after laundering
- Helps keep clothes looking good longer

TREATED

UNTREATED

3M SCOTCHGARD™ MOISTURE MANAGEMENT PROTECTION

A new generation is embracing a more active, more healthy lifestyle. And you want textiles that work as hard as you do, keeping you comfortable and dry, and continuing to look good day after day. Scotchgard™ Protector with a moisture management finish helps transport perspiration away from the body and helps washes stay away in the laundry. So, even the most active people stay cooler, drier and cleaner.

Textiles need to stand up to rigorous usage and retain its functional properties. Bonded to each individual fiber of the fabric, Scotchgard™ Protector Moisture Management forms an invisible, durable finish that stops stains and absorbs perspiration, spreading it out of for more effective evaporation. The results: textiles stay drier and are more comfortable. Fabrics remain soft and breathable, with a look and feel indistinguishable from untreated fabrics.

- Wicks away moisture
- Helps most stains come out in the wash
- Fabric remains soft and breathable

WASHING INSTRUCTIONS

Do not overload washer to reduce wrinkles and extend the life of the linens.
Do not put terry items in wash with bed linens or any other items.
Do not wash WynRest® Microfiber bed linens with other bed linens.
Load washer according to the machine capacity.
Start and run washer using the correct wash cycle set up.
Follow the instructions on the care label for washing temperature.
The following references machine temperature settings:
COLD = 65F - 85F
WARM = 100F - 110F
HOT = 120F - 140F
Remove bed linens from washer promptly when cycle is complete.
Do not leave washed damp laundry in washer or in laundry cart overnight.
Sort items - Bed linens should be separated into the following categories then washed and dried separately.
- Sheets
- Pillowcases

<table>
<thead>
<tr>
<th>WASHER LOADING CAPACITIES</th>

<tr>
<td>75</td>
</tr>
</tbody>
</table>

Recommend sheets and pillowcases get loaded at 95% of the wash machines rating to ensure proper washing.

DRIYING INSTRUCTIONS

Do not overload dryer - Dryer overloading causes more wrinkles and can damage fabric.
Set appropriate drying time and temperatures.
Do not put terry items in dryer with bed linens.
Do not dry WynRest® Microfiber bedlinens with other bed linens.
Clean lint traps at least every 3 to 4 hours.
Do not over dry.
Remove bed linens from dryer promptly when cycle is complete.
Do not dump items into carts where additional creasing can occur.
Drape items over the cart so the fibers can relax before folding.
Prompt folding will provide the best results.
Proposed drying times are approximate and should be reviewed and adjusted based on dryer performance.

DRIYING TEMPERATURES ARE IMPORTANT

Temperatures that are too cool will not provide the heat required to relax fibers.
Temperatures that are too hot will set creases and wrinkles and affect the overall quality and product life.
Set dryer cycle times and temperatures for each item per the chart and adjust as necessary.

**RECOMMENDED ALTERNATIVE TO MEET BRAND STANDARD #700.03.02**
This product is a recommended alternative to meet Brand Standard #700.03.02 for all Brands required to provide T200 WynRest® linen.

**HOW TO ORDER**
WynRest® linen and filled products are available to order from Wyndham Hotels & Resorts’ approved Operating Supplies and Equipment (OS&E) distributors listed on page 39.
The modern mode to providing immaculate bedding while reducing costs and saving time

Simply put, the theory behind triple sheeting is to replace the coverlet with a top sheet. It is no surprise that this innovative bedding option incorporated by Wyndham Hotel & Resorts offers benefits for both hoteliers and their customers.

Guests love triple sheeting.

The warmth component, or blanket, is protected from dust, allergens, and stains by the top sheet. Top sheets can be easily and frequently washed, providing the guest with the feeling of security that they are in a freshly laundered bed. Many top sheets have built-in stain resistant technology.

Another benefit of triple sheeting is that it is cost and time conducive to turning a room.

Replacing comforters can become a costly expenditure. Laundering bulky comforters can also be a significant monetary and time investment; often comforters cannot be cleaned at the hotel property, and it has to be contracted out by a service company. Triple sheets and WynRest® blankets can be easily laundered within the facility. The WynRest® Dolce Notte Top Sheets and polyester-filled WynRest® Quilted Duvet Inserts and Filled Blankets also dry quickly, minimizing cleaning time. Furthermore, housekeepers will save time making beds with top sheets instead of having to insert blankets into duvet covers.

An additional rationale for utilizing the triple sheeting method includes the ease of modernization.

Top sheets are typically more inexpensive than coverlets. It is effective yet economical to revamp a room by simply replacing the top sheet with a different style and color.

Try AVM's triple sheet solution below as a surefire way to satisfy your guests while saving you effort, time and money:

For maximum protection start with the right products+ from the box spring up...

Layer 1 - Box Spring & Mattress Set Encasements+ - Protect-A-Bed Allerzip Smooth or BugLock Plus
Layer 2 - Mattress Pad+ - WynRes® 4 oz. or 14 oz. Mattress Pads
Layer 3 - Fitted Sheet+ - WynRest® T-200, T-250 or T-300 Fitted Sheets
Layer 4 - Flat Sheet+ - WynRest® T-200, Microfiber, T-250 or T-300 Sheets
Layer 5 - Blanket+ - WynRest® Down Filled Alternative Blanket and/or WynRest® Duvet Insert
Layer 6 - Top Sheet* - WynRest® Dolce Notte T-220 Twill Stripe Top Sheet*

When you get to Layer 4 - adding the flat sheet - follow these steps to create triple sheeting*...

Step 1 - Flat Sheet - The hem of the flat sheet is brought to the tip of where the mattress meets the headboard.
Step 2 - Blanket - The Blanket is placed 6” from the tip of where the mattress meets the headboard.
Step 3 - The Top Sheet - The top sheet is placed to the tip of the mattress overlaying the blanket and flat sheet.
Step 4 - First Fold - Fold the flat sheet and top sheet down 6”.
Step 5 - Second Fold - Fold the flat sheet, blanket, and top sheet down another 6” inches.
Step 6 - Finishing Touches - Tuck in and smooth out the sheets and corners.

*REQUIRED TO MEET BRAND STANDARD #700.03.02:
Triple sheeting using the Dolce Notte T-220 Twill Stripe Top Sheet is required to meet Brand Standard #700.03.02 for the following brands: Days Inn® by Wyndham, Howard Johnson® by Wyndham, Ramada® by Wyndham and Wingate by Wyndham®.

Prolong the life of your linens with proper care

Of all the items guests come into contact with during their hotel stay, bedding likely represents the largest percentage. It’s the pillows, comforters, duvets, sheets, blankets and bed skirts that take center stage from the moment a guest walks through the door. So, how they look, feel -- and smell -- is important. As the saying goes, you never get a second chance to make a first impression.

If a guest finds the quality, condition or cleanliness of the bedding less than appealing -- bedding is stained, frayed or worn-out and dirty -- a lasting impression is made about the overall cleanliness of the room and your hotel. Satisfaction suffers instantly. To win their trust and loyalty, it’s important to make that experience a positive one.

Branded top-of-bed specifications may vary, but proper bedding care is a critical housekeeping practice. And while considerations need to be made for fabric type, here are a few valuable tips that will help extend top-of-bed investments and ensure an exceptional guest experience.

1. Keep an Appropriate Amount of Linens in Stock
   Why is this important? If you don’t keep enough linens on hand, you run the risk or running out during a period of high occupancy or guest use. This could ultimately lead to increased demands on housekeeping staff to process laundry quickly and may require additional labor costs. Frequent rewashing of linens can also cause them to wear out faster, shortening their lifecycle. The American Resort Development Association recommends linen inventory levels at 2.5 to 3 par – in other words, one set of linens for use, one for storage and one that can be in the wash for each room.

2. Always Review Wash Instructions
   Standards change. Vendors change. Products change. It’s important to review the wash instructions for all linens and top of bed products and adhere to recommended guidelines to avoid damage and extend their usable life.

3. Implement Low Temperature Wash Programs
   Low temperature wash solutions are designed to reduce energy and water consumption and are gentler on linens, reducing wear while eliminating stains. New product formulations promise to extend the life of your linens significantly as well, reducing your overall operational costs.

Wash Basics

Reversible Blankets, Bed Skirts and Throw Pillows:
- Wash like colors and products together
- Machine wash warm (120 to 160 degrees Fahrenheit)
- Do not use caustic soap, silicone products or fabric softener
- Tumble dry, low heat. Excessive heat can damage fabrics
- Remove promptly to avoid wrinkling
- Use iron as needed, on low setting

Top Sheets, Pillow Case Sheets, Duvets and Duvet Inserts (60% cotton/40% polyester):
- Wash at 120 degrees
- Wash and dry separately from other textiles
- Use non-chloride bleach if needed
- Do not overload machines or fabric damage may result
- Tumble dry low at recommended temperature to retain some moisture content and let air dry when folded
- Remove dryer promptly to avoid wrinkling

For specific bedding fabric care and laundering frequency recommendations, contact your distributor directly. For more information on available products, visit the Strategic Sourcing website at www.WHRSourcing.com
What you need, where you need it and at a price you can count on. That’s the promise of our Operating Supplies & Equipment (OS&E) program. Our approved distributors deliver the products you need to achieve brand consistency, delight guests and keep your business running smoothly and profitably.

By using Protect-A-Bed products, hoteliers offer guests a healthy sleep environment, free from liquid damage including spills. Encasements also prevent entry of allergens, dust mites, dead skin and mold. Guests get what they want - a superior night’s sleep, and hoteliers protect their valuable mattress investments for less than the cost of a deep cleaning.

WWW.FPGHOSPITALITY.COM
866-793-9644
By using Protect-A-Bed products, hoteliers offer guests a healthy sleep environment, free from liquid damage including spills. Encasements also prevent entry of allergens, dust mites, dead skin and mold. Guests get what they want - a superior night’s sleep, and hoteliers protect their valuable mattress investments for less than the cost of a deep cleaning.

If you’re looking for full coverage mattress protection, our encasements offer complete coverage from bed bugs. Choose from 6-sided waterproof protection with AllerZip, top surface only waterproof protection with BugLock Plus or opt for pest protection without waterproofing with our Bedding Encasement.

Why should I protect my bed?
Protect-A-Bed products shield your mattress from stains, spills, pests and allergens. Our products extend the life of your assets, while improving comfort and hygiene for your guests.

$6,383 average cost of a bed bug incident
Unfortunately, bed bugs travel with your guests. No property is safe. The key to preventing costly remediation is early detection.

Mattress Encasements
If you’re looking for full coverage mattress protection, our encasements offer complete coverage from bed bugs. Choose from 6-sided waterproof protection with AllerZip, top surface only waterproof protection with BugLock Plus or opt for pest protection without waterproofing with our Bedding Encasement.

Features & Benefits

- Full Coverage Protection
  Total coverage against bed bug on all sides of the mattress

- Industrial-Strength Fabric
  Tested to withstand up to 200 wash cycles

- Waterproof Miracle Membrane®
  Blocks dust mites, allergens, mold, pet dander, liquids and sweat

- Easy Installation
  3-sided micro-toothed zipper makes installation easier on housekeepers

- Prevents Bed Bugs
  Patented BugLock® Zipper is certified to prevent bed bug entry and escape

Tip: don’t forget your sleeper sofa
Sofa beds are usually slept on by children making them more prone to stains, spills, and accidents, while the dark, soft crevices of a sofa are an ideal hiding place for pests. We offer 6-sided waterproof encasements for full and queen size sleeper sofa mattresses.
Protect-A-Bed encasements come in a variety of sizes to ensure a snug fit. Be sure to measure the mattress and the box spring for accurate fit (width x length x depth). The better the fit, the better sleep experience provided to your guest.

- Protect-A-Bed has a smooth, appealing fit to enhance the guest experience
- Encasements are available in three depths to ensure a snug fit for every mattress
- Contoured fit provides early detection of bed bugs
- Seamless layer of waterproof protection absorbs moisture wicking it away from the sleeper - will not pool or run off the sides

Protect-A-Bed’s products feature Miracle Membrane, a protective backing that creates a waterproof, air vapor-porous layer designed to sleep cool, comfortable and quiet. This ensures comfort, cleanliness, and extends the life of an expensive, yet vulnerable asset. Our mattress protectors are available with or without a quilted cotton-poly fill.

**tip:** add any of our waterproof mattress protectors on top of our bedding encasement for full coverage bed bug protection with a removable waterproof top
maximum protection

For maximum protection start at the bottom. Box springs are the ideal breeding ground for bed bugs.
1. Encase Your Box Spring
2. Encase Your Mattress
3. Add a Fitted Sheet Style Mattress Protector or Pad
4. Protect Your Pillows

Watch Chris’s story. See how he saved 75% in linen replacement* costs, alongside consistently clean, white, soft and fresh results, by switching to Ecolab’s Aquanomic Low Temp Laundry Program.

“Everything we do is for the guests.”

“The laundry agents were very frustrated every single day - they couldn’t get the laundry completely clean. Within days, we started seeing gray linen turning white and dingy linen turning bright.”

- Chris Daley,
  General Manager, Super 8® by Wyndham

75% Savings in Linen Replacement Costs

Rewash and Overall Operational Costs

Less time spent on the labor intensive task of organizing and disposing damaged linens

Reduced graying and yellowing of linens

Increased proper use of product and dispenser with training from Ecolab representative

Reduced safety risk due to lightweight solids and closed loop dispensing system

See the full story and learn more at www.ecolab.com/aquanomic

Contact your Ecolab Representative or call 800.35.CLEAN

*Because of factors outside of Ecolab’s control, such as water conditions, procedures, and any other factors, results to be obtained including but not limited to linen replacement cannot be predicted or guaranteed by Ecolab.
